# WHO ARE ABLE CANOPIES?

At Able Canopies Ltd, we are a **UK-based** company that specialises in the **supply and installation** of high-performance polycarbonate roofing solutions for **large sports stadium developments**. Working closely with contractors, architects and specifiers, we deliver durable, compliant, and visually integrated weather protection systems suited to high-footfall public environments.

Our polycarbonate roofing systems are ideal for large sport stadium projects, providing effective shelter and solar control while enhancing user comfort and safety. Each solution is designed to integrate seamlessly with the wider stadium architecture and project requirements.

We can manage the entire process in-house, from design and manufacture through to installation, and can attend site meetings as required to support programme coordination. This controlled approach ensures consistent quality, reliable delivery, and a smooth installation process on complex, large-scale stadium projects.

# 15 YEAR WARRANTIES

Our polycarbonate glazing systems, including Sunpal® and Sunglaze®, are supplied with a 15-year product warranty, providing assurance of quality and longevity. This warranty reflects the confidence we have in the materials we use and their ability to perform reliably over time.

The warranty covers the structural integrity and performance of the polycarbonate sheets when installed in accordance with our specifications. This offers contractors and architects peace of mind that the glazing systems will maintain their functionality and appearance throughout their service life.

By specifying Able Canopies' polycarbonate glazing systems, project teams benefit from a proven, warranted solution that supports long-term asset value and reduces future maintenance risk.

# RELIABLE UK SUPPLY AND DISTRIBUTION

Able Canopies are a UK-based company with a dedicated UK warehouse, ensuring full control over the supply of our polycarbonate glazing systems. This local presence allows us to support projects nationwide with reliability and consistency.

By sourcing and distributing our polycarbonate glazing systems directly from our UK warehouse, we reduce lead times and minimise supply chain uncertainty. This enables a smooth, well-coordinated service that aligns with construction programmes and site requirements.

Our established UK operations allow us to provide a professional, responsive service, giving contractors and architects confidence that materials will be delivered on time and supported by a knowledgeable in-house team throughout the project lifecycle.

# 20 YEARS OF PROVEN EXPERIENCE

Established over 20 years ago, Able Canopies has developed extensive experience within the shade and shelter industry. During this time, the business has built a strong reputation for delivering high-quality solutions across a wide range of commercial and public-sector projects.

This experience covers both supply and installation, with regular collaboration alongside architects, contractors, and specifiers from design through to completion. A clear understanding of technical requirements, site coordination, and programme demands enables reliable delivery on complex projects.

# FEATURED PRODUCT: SUNGLAZE POLYCARBONATE GLAZING SYSTEM

Sunglaze® is a solid polycarbonate glazing system suitable for a wide range of applications, from large-scale projects such as sports arenas and shopping centres to smaller installations including school canopies.

Manufactured from solid polycarbonate with a glass-like appearance, it is available in clear or opal finishes and is supported by aluminium rafters that provide strength, lightweight performance, and natural corrosion resistance.

Supplied as standard in anodised aluminium, with optional powder coating in any RAL colour, Sunglaze® is a proven solution used internationally across multiple sectors and is backed by a 15-year product warranty, making it a reliable roof covering choice for long-term projects.

Northern Grandstand, Australia*

# FEATURED PRODUCT: SUNPAL POLYCARBONATE GLAZING SYSTEM

Sunpal® is a multi-wall polycarbonate glazing roof system that is perfect for covering large architectural designs such as sports stadiums, shopping complexes, leisure facilities and much more. With a choice of polycarbonate thicknesses to choose from, and the ability to cover projects of any size, Sunpal® could be the perfect product for your project.

Featuring aluminium rafters which are naturally rust resistant and which can be finished in any RAL, along with high-strength polycarbonate panels, Sunpal® is sure to fit in perfectly with your design.

Whether your proposal features a curved, domed or mono roof, Sunpal® will be able to cover it seamlessly as it can adapt to shapes onsite.

# FEATURED PRODUCT: SUNTUF POLYCARBONATE GLAZING SYSTEM

Designed to meet complex engineering challenges, SUNTUF corrugated polycarbonate sheets are ideal for industrial roofing and cladding such as sports stadiums, and for commercial skylights and daylighters.

SUNTUF offers all the unique properties of polycarbonate such as mechanical robustness, durability, light transmission, UV protection, and strength-to-weight ratio. Unlike corrugated metal sheeting and reinforced glass panels, SUNTUF installs quickly and easily, and maintains its appearance and features for years.

SUNTUF polycarbonate profiles can be adapted to match any corrugated metal profile structure using Palram MetalMatch™ technology.

This innovative system can be manufactured to large spans which results in lower overall expenses for the steel structure.

# ABLE CANOPIES INSTALLATION MAP

Over the past 20 years, Able Canopies has successfully delivered commercial shade and shelter installations across the length and breadth of the UK. The nationwide spread of completed projects demonstrates extensive experience working in diverse environments, from complex urban developments to large public and leisure facilities.

This proven delivery record reflects the capability to support large-scale, high-footfall schemes that demand robust design coordination, reliable installation, and programme certainty. For architects and contractors working on major developments such as sports and leisure venues, this depth of nationwide project experience provides confidence in Able Canopies as a dependable partner for technically demanding shade and shelter solutions.
